Summary

Front-End Developer with practical experience designing and delivering responsive, accessible, and scalable e-commerce platforms, SaaS web applications, and interactive digital portfolios. Highly skilled in Next.js App Router, TypeScript, React.js, Tailwind CSS, Convex backend, and Supabase CMS integrations. Proficient in architecting end-to-end checkout flows, webhook HMAC signature verifications (Paymob), dynamic catalog filtering, and web security (CSP, RLS, anti-spam defenses). Leverages modern AI-assisted development workflows for rapid implementation, structured debugging, and high-performance frontend architecture.

Experience

Freelance Frontend Developer

May 2025 – Present

- Delivered responsive e-commerce web applications, brand portfolios, and digital agency platforms covering high-conversion UI, modern animations, and multi-language support (AR/EN).
- Implemented secure, end-to-end e-commerce payment workflows with Paymob Intention API, including server-side webhook HMAC verification, Convex order synchronization, and error-handling state machines.
- Integrated headless Supabase and Convex backends with user authentication (Clerk / Supabase Auth), Row Level Security (RLS), and custom client CMS editors.
- Leveraged AI-assisted development tools (Cursor, Claude, ChatGPT) for rapid UI scaffolding, automated security auditing, code refactoring, and complex API troubleshooting.

Frontend Developer [Independent Projects]

Jan 2025 – May 2025

- Architected component-driven interfaces using Next.js App Router, React.js, TypeScript, and Tailwind CSS with strict attention to performance and clean code architecture.
- Achieved a 9.2/10 Code Quality & Security Audit rating across production deployments with Content Security Policy (CSP), native Gzip compression, ETag caching, and honeypot anti-spam defense.
- Built smooth bidirectional scroll-driven animations, sticky card stacking, and dark/light theme switching with zero layout shift.

Skills

Frontend Development: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Shadcn UI, Sass / SCSS, GSAP, Framer Motion, Responsive Design.

Backend & Database: Convex, Supabase (PostgreSQL, Auth, RLS Policies, Storage), Node.js, REST APIs, Clerk Auth.

E-Commerce & Payments: Paymob Intention API, Webhook HMAC Verification, Cart & Checkout Systems, Real-time Stock Filtering, i18n Localization.

Web Security & Performance: Content Security Policy (CSP), Honeypot & Time-Trap Anti-Spam, Gzip / Brotli Compression, ETag Caching, OWASP Standards.

AI & Development: Cursor, Claude, ChatGPT, Codex, AI-Assisted Coding, Prompt Engineering, Automated Auditing, Debugging & Refactoring.

Tools & Workflow: Git / GitHub, Vercel, Postman, Figma, Agile / Scrum (Jira, Trello).

Soft Skills: Problem Solving, Analytical Debugging, Clear Technical Communication, Attention to Detail, Time Management.

Projects

Hatar TCG (TCG Vault) — Full-Stack E-Commerce Platform

[Live Preview](#)

Technologies: Next.js (App Router), TypeScript, Tailwind CSS, Convex, Clerk, Paymob Intention API, Vercel

Key Features: Bilingual (AR/EN), Real-time Card Search & Inventory Filters, Clerk User Auth, Convex Order State Management, Paymob Secure Checkout.

Overview: Engineered an enterprise-grade trading card e-commerce platform. Built dynamic stock-validation filtering across major card franchises, seamless multi-language UX, and a robust payment processing pipeline handling Paymob Intention API with server-side HMAC-SHA512 webhook authentication and automatic order status transitions.

Social Culture — Digital Agency Portfolio & Headless CMS

[Live Preview](#)

Technologies: JavaScript (ES6+), Supabase (PostgreSQL, Storage), HTML5, CSS3, Vercel, REST APIs

Key Features: Dynamic Package Management, Case Study Showcase Grid, Real-time Headless CMS, Cross-browser Entrance Animations.

Overview: Built a modern agency showcase web application integrated with Supabase. Enabled non-technical marketing managers to modify service tiers, client case studies, and visual assets in real time without code redeployments.

Personal Dynamic Portfolio & Headless CMS Dashboard

[Live Preview](#)

Technologies: Vanilla JavaScript, Supabase (Auth, RLS Policies, PostgreSQL), CSS3 Tokens, Node.js
Key Features: Dark/Light Theme Switching, Odometer Rolling Card Stacking, Strict CSP, Anti-spam Honeypot & Time-Trap, 9.2/10 Audit Score.
Overview: Architected a high-performance portfolio featuring a custom Supabase CMS dashboard, bidirectional scroll-driven animations, Gzip compression (-77% transfer size), and enterprise-grade security protections.

Education & Languages

Bachelor's Degree | Computer & Information Sciences / Related Discipline
